### Objective

GOL'14 (Logistics Operations Management) aims at bringing together researchers and professionals interested in logistics not only from a technology standpoint but also from a social sciences perspective. This multi-disciplinary approach examines the current state of the art focusing on new techniques and models relevant to the operations management of various logistics flows. Conference's scope covers themes such as logistics systems modelling, decision support systems, information systems, legal and regulatory environments, framework and control of the global logistics chain, organization of manufacturing, transport and storage operations, performance modelling and measurement, and, risk analysis and planning.

**The Best papers will be selected for special issues of international journals .**

### Important dates

- **30 September 2015** : Special session proposal deadline.
- **31 January 2016** : Full papers submission ( 10 pages maximum) in PDF format
- **15 March 2016** : Notification of decisions.
- **30 April 2016** : reception of final papers

### Topics of interest include, but are not limited to
